#### **About Northern Graphite**

Northern, the only graphite producing company in North America, is a Canadian, TSX Venture Exchange listed company (NGC:TSX-V, NGPHF:OTCQB, FRA:0NG, XSTU:0NG) that is focused on becoming a world leader in producing natural

graphite and upgrading it into high-value products critical to the green economy, including anode material for lithium-ion batteries/EVs, fuel cells and graphene, as well as advanced industrial technologies.

Northern expects to become the third-largest natural graphite producer outside of China when its Namibian operations come back online. The Company also has the large-scale Bissett Creek project in Ontario, and substantial additional measured and indicated resources in Namibia and the Mousseau property in Quebec, which are expected to be sources of continued production growth in the future. All projects have “battery quality” graphite and are located close to infrastructure in politically stable jurisdictions.
