## MEDIA ADVISORY

### Natural Vs Synthetic Graphite Discussion

*Northern Graphite CEO Hugues Jacquemin to Join Panel at Benchmark Week 2023*

**WHEN:** Tuesday November 14, 2023 – 11a.m. Pacific

**WHERE:** Benchmark Week 2023 – Ritz Carleton, Los Angeles

**WHAT:** As the world debates whether it will be natural or synthetic graphite that leads Lithium-Ion batteries into the future, Northern Graphite Chief Executive Officer Hugues Jacquemin will join Benchmark Week 2023 for an in-depth panel discussion on Natural Vs Synthetic Graphite - Understanding the global supply/demand balance, battery performance, environmental & geopolitical considerations.

[Benchmark Week 2023](#) is an annual event hosted by Benchmark Mineral Intelligence that brings together leaders working to build the world's lithium-ion battery supply chain and advance the wider energy transition. Multiple content streams will be held simultaneously over three days to provide broader context of the opportunities and challenges facing clean energy supply chains, with in-depth expert presentations, discussions and networking.

## About Northern Graphite

Northern Graphite is North America's only graphite producing company. It is a Canadian, TSX Venture Exchange-listed company that is focused on becoming a world leader in producing natural graphite and upgrading it into high value products critical to the energy transition, including anode material for lithium-ion batteries/EVs, fuel cells and graphene, as well as advanced industrial technologies. Northern will become the third-largest producer outside of China when its Namibian operations come back online. The Company also has a large-scale development project, Bissett Creek, in Ontario that we expect will be a source of continued production growth in the future. All projects have "battery quality" graphite and are located close to infrastructure in politically stable jurisdictions.
