Northern Graphite to Join Team Canada Critical Mineral Investment Mission to London, Paris

September 25, 2023: Northern Graphite Corporation (**NGC:TSX-V, NGPHF:OTCQB, FRA:0NG, XSTU:0NG**) (the “**Company**” or “**Northern**”) is pleased to announce that it will be joining the Team Canada Critical Mineral Investment Mission to Europe, organized by Natural Resources Canada, Invest in Canada and Global Affairs Canada, which takes place September 26-27 in London and Paris.

The two-day mission is a unique opportunity for Canadian companies with advanced exploration, processing and/or recycling projects for zero emission and clean technology minerals and metals to showcase their projects to in-market investors and includes downstream companies such as cathode/anode manufacturers and OEMS, global mining companies, venture capital and private equity funds, institutional investors, and public-private funds.

Events will see the delegation participate in investment pitch sessions, business to business meetings, as well as meetings with government department and agencies. Officials from respective governments will also participate, providing overviews of policies, priorities, and efforts to support the development of mining value chains.

“We are honored to be a part of such an important delegation,” said Northern Graphite Chief Executive Officer Hugues Jacquemin. “Collaboration is critical as we explore ways to leverage the strength of our economies’ sustainable critical minerals supply chains and advance toward a net-zero future, and Northern Graphite, as a sustainable, integrated, mine-to-market company, is committed to playing its part.”

On March 6, Canada and the UK signed the [Critical Minerals Supply Chain Dialogue to Strengthen Collaboration](#) to deepen engagement and cooperation on critical minerals, prioritize critical minerals security of supply and joint economic prosperity, and attain high environmental, social and governance standards (ESG) and innovation throughout the value chain.

About Northern Graphite

Northern is a Canadian, TSX Venture Exchange listed company that is focused on becoming a world leader in producing natural graphite and upgrading it into high value products critical to the green economy including anode material for lithium-ion batteries/EVs, fuel cells and graphene, as well as advanced industrial technologies.

Northern is the only significant graphite producing company in North America and will become the third largest producer outside of China when its Namibian operations come back online. The Company also has two large scale development projects, Bissett Creek in Ontario, and Okanjande in Namibia, that have the potential to generate continued production growth in the future. All projects have “battery quality” graphite and are located close to infrastructure in politically stable jurisdictions.
